

# Introduction To Cashflow Analysis

## Table of Contents, 11th Edition

Introduction vii-viii

### **Chapter 1:**

Present Values, Future Values  
Cashflow Definitions, Negative and Positive  
Observing the Sign Convention  
Positive or Negative Cashflow as a Relative Concept  
Analyzing Cashflows from a Single Vantage Point  
T-Bar Representation of Cashflows  
Mathematical relationships: PV, FV  
Using the Calculator's Financial Register  
Discounting: Valuation of Trust Deed Notes  
n Delivered Only As Integer  
Determining a Yield from Even Payments  
Distinguishing Between PMTs and FV  
Present Value of Annuities in Perpetuity  
Present Value of Finite Annuities, Ordinary and Annuity Due  
Present Value of Perpetual Annuities Adjusted for Growth Factor  
Present Value of Finite Annuities Adjusted for Growth Factor  
Adjusting Rates to Compensate for Inflation  
Interest Rates, Nominal vs. Effective  
Continuous Compounding & Discounting  
Derivation and Use of Epsilon ( $\epsilon$ )

### **Chapters 2 :**

Working With Uneven Cashflows  
Alternate Financial Register  
Adding Cashflows To A Series  
Using Nj To Indicate Repeating Cashflows  
Limitations on the Number of Cashflows  
Adjusting for Incorrect Entries in CFj and Nj  
Discounting Cashflows from Leases  
Net Present Value, Definition and Determination  
Discount Rate Varies with Risk  
Return on Investment (ROI)  
NPV of an Income-Producing Realty  
Internal Rate of Return (IRR)  
Negative Cashflows and the IRR  
PMTs Occurring at the Beginning of the Period  
PV & NPV on Computer Spreadsheet  
Handling Series which Exceeds Calculator Capacity  
Valuing Cashflows from Small Business  
Opportunities

### **Chapter 3:**

Annuities & Rates  
Perpetual annuities  
Ordinary annuities, annuities due  
Determining required payments  
Nominal vs. effective rates  
Using the Inflation Adjusted Rate  
Continuous compounding, discounting  
Adjusting rates to compensate for inflation  
Graduate Payment Annuity  
Calculating changes in CPI

### **Chapter 4:**

The Internal & Modified Rates of Return  
Definition of IRR  
IRR Under Different Aliases  
Iteration  
IRR by Construction  
IRR by Interpolation  
Meaning of the IRR  
Limitations to the IRR, real and imagined  
Possible Multiple IRRs for the Same Cashflow  
Reinvestment Rate of Payments – Does It Matter?  
IRR and Negative Payments  
Modified Internal Rate of Return (MIRR)(FMRR)  
Geometric Rate of Return  
XIRR, XNPV

### **Chapter 5:**

Cashflows from Stocks  
Valuing Cashflows from Stocks  
Market Capitalization Rate, Stocks  
Capitalization of Dividend  
Contribution of Growth to Price  
Components of Market Capitalization Rate  
The Re-Investment Ratio  
Rate of Return on Equity (ROE)  
Contribution of IRR of New Projects to Stock Value  
Growth without Dividends  
Price/Earnings Ratio  
PEG Ratio  
Safe Rate of Return  
Cashflows from REITs  
Free Cashflow per Share

## **Chapter 6:**

Cashflows from Bonds  
Coupon Rates and Maturity Dates  
When Bonds Are Called  
Bond Terminology: Rates, Ticks, Bid, Ask and Yield-To-Maturity  
Calculating Bond Yields  
Determining Bond Price, Given a Yield  
Determining Bond Yield Using Call Dates  
Spot Rate for Money  
Term Structure of Interest Rates, Yield Curves  
Bond Duration  
Convexity of Yield Curve  
Macaulay's Duration Factor  
Calculation of Bond Duration  
Factors Determining Bond Duration  
Using Duration to Estimate Bond Price  
Using Duration to Estimate Bond Portfolio Price Change  
Zero Coupon Bonds  
Volatility  
Duration of Zero Coupon Bonds  
Taxation of Zero Coupon Bonds  
Use of Zero Bonds as Planning Tool

## **Chapter 7:**

Risk Analysis  
Components of Discount Rate  
Safe Rate and Inflation  
Expected Rate of Return  
Deviation & Variance of historical returns  
Deviation & Variance of expected (probable) returns  
Meaning of Deviation  
Empirical Rule  
Semi-Variance  
Semi-Standard Deviation  
Sharpe's Index of Risk  
Risk of Portfolio of stocks  
Unique (Unsystematic) vs. Market (Systematic) risk  
Correlation coefficient  
Covariance  
Market Portfolio Theory  
Beta, Alpha  
R-Squared  
Monte Carlo Simulation  
Bond Ratings: S & P, Moody's, Fitch

## **Chapter 8:**

Cashflows from Promissory Notes & Mortgages  
Distinguishing Mortgages & Trust Deed Loans  
Fixed Rate, Amortizing Mortgage

The Amortization Schedule  
Determining the Payment Necessary  
Solving for n, the Number of Periods  
Solving for a Balloon Payment  
Solving for the Interest Rate i  
Payments when the Period is Not Monthly  
Constructing an Amortization Schedule  
Mortgage Interest Paid in Arrears (Ordinary Annuity)  
Creating Amortization Schedules Using the HP 12C  
Determining Remaining Balances  
The Adjustable Rate Mortgage Margin, or Spread  
Negatively Amortizing Mortgage  
Base Indices  
Cost of Funds Index  
Teaser Rates  
ARMS Subject to Significant Lender Errors  
Progress of an ARM  
Basis Points, Definition (footnote)  
Amortization Schedule  
Determining Maximum Interest Rate  
Limit On Payment Increases  
Why PMTs May Not Decline  
Recasting an ARM  
When to Choose an ARM Over a Fixed-Rate Mortgage  
Buydown Mortgages  
3-2-1 and Other Arrangements  
Developer Buys Out  
Determining Builder's Paydown  
Buydown Available to Private Home Sellers  
All-Inclusive Deed Of Trust Mortgage  
Capital Structures  
"Subject to" Clauses  
Assuming a Loan  
Calculating the Yield  
Constructing an AITD to Produce a Specified Yield  
AITDs Using Adjustable Interest Rates  
Multiple Notes Underlying an AITD  
Escrow AITD Payments  
CAVEAT re AITDs  
Loan Constants, Debt and Loan Ratios, APRs  
Monthly Loan Constants  
Residential Loan Underwriting Guidelines  
Use of Front-End & Back-End Ratios  
Loan-to-Value Ratios  
Debt Service (Coverage) Ratios  
Annual Percentage Rate (APR)  
Graduated Payment Mortgage, GPM Annuity  
Discounted Value of the Payments

Determining the Payments  
GPM Loan Factors  
Commercial Applications of Concept  
Application of GPM Concept to Financial Planning

**Chapter 9:**

Valuing Cashflows from Real Estate  
Capitalization Rates  
Source of Capitalization Rates  
Why the Capitalization Rate Changes  
The Rate of Return OF Capital  
The Rate of Return ON Capital  
Required Return Rates and Risk  
Band of Investments Approach  
Strengths and Weaknesses of the Cap Rate  
Market Value vs. Investment Value  
Cash-on-Cash, Gross Rent Multipliers  
Distinguishing ROI, ROE, IRR  
Why Monitor Equity Buildup  
Utilizing Discounted Cash Flow Analysis  
Pre-tax or After-tax?  
Determining Pre-tax & After-tax Cashflows  
Developing a Pro-Forma  
Choosing the Correct Depreciation Schedule  
Importance of Assumptions  
Choosing Depreciation Schedule  
How Loan Points are Handled  
Determining the Original Basis  
Adjusted Basis at Time of Disposition  
Reversion Value (FV) of the Investment Property  
Estimating Final Gross Sales Price  
Capital Gains and Capital Gains Tax  
Recapture of Depreciation  
Estimate of Net Proceeds  
Selecting an Appropriate Discount Rate

**Chapter 10:**

Effect of Leverage on Investment Cashflows  
Definition of Leverage  
Neutral, Positive, Negative Leverage  
Benefits and Risks of Leverage  
Effect of Leverage on ROE  
Determining Maximum Leverage  
Effect of Leverage on IRR

**Chapter 11:**

Problems and Answers

**Appendix:**

Formulas for Cashflows  
Using the Inflation-adjusted interest rate (IAR)

**Glossary**

**Index**
